LUCAS 2009 AGRI-ENVIRONMENTAL SURVEY

PROJECT PRESENTATION

Land use/cover area frame statistical survey (LUCAS) 2009 – Agri-environmental survey

LUCAS is an area frame survey fully designed and managed by EU (Eurostat). **Geodetski zavod Celje, d.o.o.** was successfully in charge of the field LUCAS 2009 data collection in Slovenia.

LUCAS OBJECTIVES:

- To collect statistical information of land use/cover and selected agri- environmental issues by field observation of specific geographically referenced points
- To obtain harmonised data at EU level (23 countries) on: environmental features, land use/cover and change and to generate data for model validation
- To analyse interaction agriculture-environment-landscape
- To provide a common methodology-nomenclature ensuring full comparability of results among countries
- To analyse the interaction agriculture-environment-landscape (multi-purpose survey)

DATA COLLECTION PROCESS:

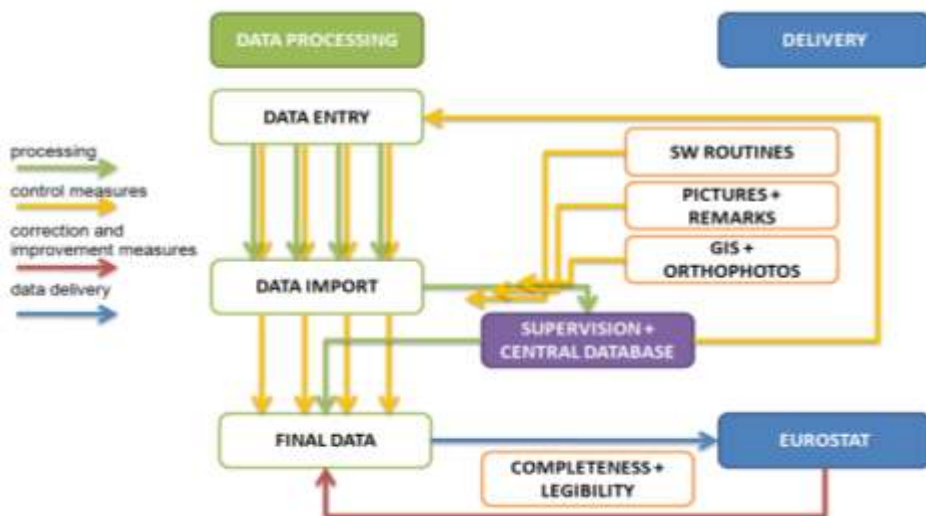

OBSERVED PARAMETERS:

- Header data of survey & observation
- Land Cover (observation window, area size, height of trees, percentage of coverage)
- Land Use and land management
- Photos (landscape, point, crop, transect, irrigation, ...)
- Water management
- Transect

DATA TRANSMISSION AND SUPERVISION:
